With respect to claim 3, Kyronlhati discloses the telecommunication terminal apparatus 100 however does not specifically disclose wherein said musical tone-generating means is responsive to an instruction from control unit for ending the notification using the melody, for stopping reproducing the musical composition data and for writing information indicative of a reproduction stop position of the musical composition data, however the prior art does not disclose wherein the musical data having been reproduced and a starting point corresponding to a rear position closest to the reproduction stop position among the plurality of starting points into said point register means.

With respect to claim 4, Kyronlhati discloses the telecommunication terminal apparatus however does not specifically disclose wherein said musical tone-generating means is responsive to the instruction for starting the notification using the melody at point, however the prior art does not disclose wherein generating the melody from a starting point corresponding to a rear position closest to the performance starting position stored in said point register means among the plurality of starting points.

With respect to claim 5, Kyronlhati discloses a telecommunications terminal apparatus however does not specifically disclose wherein one starting point can be selected from among the plurality of starting points, and the selected one starting point is written as the arbitrary performance starting position into said point register means.

With respect to claim 8, Kyronlhati telecommunication terminal apparatus operable for providing a notification using a melody, comprising: storage 10 means capable of storing musical composition data in which a plurality of starting points suitable for starting performance are set; (Abstract)

point register means for storing information indicative of an arbitrary performance starting position of the musical composition data; (Col.5 line 48-57)

and musical tone-generating means responsive to an instruction for starting the notification using the melody, for reading out the musical composition data from said storage means and for reproducing the read out musical composition data according to

the information indicative of the arbitrary performance starting position, (Col.5 line 56-Col.6 line 11) stored in said point register means, however the prior art does not specifically disclose wherein the start generating the melody from the arbitrary performance starting position of the musical composition data, wherein said point register means is operable for storing, as the information indicative of the arbitrary performance starting position, a starting point coincident with a performance ending position of the musical composition data among the plurality of starting points set in the musical composition or the closest starting point after the performance ending position among the plurality of starting points.

With respect to claim 9, Kyronlhati discloses the telecommunication terminal apparatus operable for providing a notification using a melody, (Abstract) comprising: storage means operable for storing musical composition data in which a plurality of starting points suitable for starting performance are set;

point register means for storing information indicative of an arbitrary performance starting position of the musical composition data; (Col.5 line 48-57)

and musical tone-generating means responsive to an instruction for starting the notification using the melody, for comparing the information indicative of the arbitrary performance starting position stored in the point register means with the plurality of starting points set in the musical composition data, and for detecting the starting point coincident with the performance ending position among the plurality of starting points or the closest starting point after the performance ending position among the plurality of

starting points and reproducing the musical composition data according to the detected starting point, to thereby start generating the melody from the arbitrary performance starting position of the musical composition data, (Col.5 line 56-Col.6 line 11) however the prior art does not specifically disclose wherein said point register means is operable for storing, as the information indicative of the arbitrary performance starting position, a performance ending position of the musical composition data which has been reproduced by said musical tone-generating means

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
